

CD BUSINESS CARDS

The CD Business Card is one of the most effective marketing tools ever created. A full-scale presentation in the palm of your hand - more importantly, in your client's hand. Not only will your client view it, they will share your card with an average of 4-5 people.

If you want to leave a professional and lasting impression on your current and future clients, then this new marketing and communications tool is a must for your business.

Our cards can contain up to 70 MB of information, in any format you want. Have a full multimedia Flash or PowerPoint presentation with hyperlinks to your website, or combine your business card with company brochures and videos, even fully interactive 3D models.

Prime Web Solutions can design, develop and reproduce your CD business cards, creating a complete interactive experience between your company and your clients.
